

Import Grades from D2L Brightspace in to Grade Entry System on E-Services

Instructors have the *option* to import final grades from D2L Brightspace into ISRS via the E-Services Grade Entry system.

How does the D2L Brightspace import work?

- Instructors can import their grades from D2L Brightspace in to the grade entry system on E-Services.
- The D2L import helps diminish the manual grade entry in to both systems. After the grades are imported, instructors will still need to “post” their grades on E-Services.
- There are settings that need to be updated on D2L Brightspace to allow the grades to be imported in to E-Services.

If the D2L Brightspace import is desired, go to the following for set up information:
